Endorsement and Statement by the Board of Directors and the CEO

The Condensed Consolidated Interim Financial Statements of Landsbankinn hf. (the "Bank" or "Landsbankinn") for the first six months of 2014 include the Bank and its subsidiaries (collectively referred to as the "Group").

Landsbankinn was founded on 7 October 2008. The Bank is a leader in the domestic market and offers a complete range of financial products and services to personal, corporate and institutional customers.

The Icelandic State Treasury holds 97.92% of shares in Landsbankinn, managed by Icelandic State Financial Investments (ISFI). The Bank's current and former employees hold 0.78% and the Bank itself holds 1.30% of own shares.

Operations

The Group's profit for the first six months of the year 2014 was ISK 14,878 million. The Group's equity at the end of this period amounted to ISK 235,894 million. The capital adequacy ratio of the Group, calculated according to the Act on Financial Undertakings, was 26.8% at the end of the second quarter of 2014. As at 30 June 2014, the Group's total assets amounted to ISK 1,154,598 million.

In April 2014, the Bank opened a specialised Corporate Service Centre for small and medium-sized enterprises (SMEs) located in the capital city region. This arrangement provides SMEs in the region with access to higher quality and more comprehensive expert services in one place. Other branches in the capital city region will be dedicated to personal banking and simplified services to corporates. These changes are intended to improve service quality to individuals and corporates alike and increase the operational efficiency of the Bank's customer service. The shift of these services from personal banking to corporate banking has been accounted for in the operating segments as shown in Note 4.

In June 2014, the Bank concluded a sale of its 9.9% share in Iceland Enterprise Investment Fund (EIF) slhf. and its entire shareholding of 27.6% in Icelandic Enterprise Invest (IEI) slhf. The total proceeds from the sale amounted to ISK 7,024 million. With a 17.7% share, the Bank is now the second largest shareholder in EIF. The Bank recognised a profit of ISK 4,885 million in the second quarter of 2014 as a result of both the sale and the fair value change of the Bank's remaining stake in EIF.

The recalculation of customer loan contracts which fall under the precedent of the Supreme Court's ruling on foreign currency indexation are ongoing and are expected to be finalised in the coming months. There are, however, some material litigation cases still pending which are expected to provide further clarification on the precedence of these rulings.

On 8 May 2014, the Bank and the Winding-up Board of LBI hf. reached an agreement on amendments to contractual obligations under the Bank's secured bonds, denominated in foreign currencies and issued to LBI hf. The agreement is conditional upon the Winding-up Board of LBI hf. obtaining certain exemptions with regard to capital controls. Pursuant to this agreement, inter alia, regular instalments currently scheduled for the years 2014-2018 will be extended to the years 2014-2026 and interest rate terms will remain unchanged until 2018, stepping-up for each maturity thereafter. The Bank will not be required to convert any outstanding bonds to Eurobonds before October 2018 and specific restrictions on dividend payments will be removed. Should the agreement be finalised, it would be an improvement of Landsbankinn's balance sheet financing and a significant step towards the easing of capital controls in Iceland. The Winding-up Board of LBI hf. is awaiting approval from the Central Bank of Iceland concerning its request for exemptions with regard to capital controls. Consequently, the agreement between the Bank and the Winding-up Board of LBI hf. has not yet come into effect.

The Bank is finalising a EUR 1,000 million Euro Medium Term Note (EMTN) Programme which will enable the Bank to issue senior unsecured notes in a broad range of currencies. The arranger of the Programme will be Deutsche Bank AG.

Risk management

The Bank is party to litigation cases that have had or may have significant impact (see Note 21). In one such case, the Bank awaits the advisory opinion of the EFTA Court concerning, inter alia, the interpretation of the Consumer Credit Directive 87/102/EEC with regard to the calculation method of the total cost of a credit and of the annual percentage rate of charge for a loan agreement linked to inflation as expressed in the national consumer price index. Subsequently, the case will be heard before Icelandic courts.

The ratio of non-performing loans has steadily decreased since year-end 2013 and borrower credit quality has been stable. Borrowers on watch lists are decreasing in numbers, signalling a better position compared to previous years. Loans to customers are increasing, especially new lending in the mortgage sector.

The Bank's core operations are sound and have been improving in recent years. Processes are being revised on a continuous basis to improve risk management, efficiency and customer relationship management. The Group's liquidity position is strong in both ISK and foreign currencies, and its Tier 1 ratio is considerably higher than the minimum required by the Financial Supervisory Authority in Iceland (FME). The Bank's stress testing of its capital requirements are also reviewed under a variety of economic scenarios.

Outlook

Landsbankinn Economic Research believes that the economic outlook for 2014 has improved somewhat since its last forecast in November 2013 and has therefore revised its previous GDP growth forecast from 2.9% to 3.2%. Furthermore, the GDP growth forecast for 2015 has been revised upward to 5.5%, which is more than double the growth predicted in the previous forecast. However, there continue to be economic uncertainties due to Iceland's current capital controls. In addition, the increased taxation of the Bank, net interest income, valuation adjustments, other net operating income and litigation risk are factors that need to be considered in terms of future profitability of the Bank.

Statement by the Board of Directors and the CEO

The Condensed Consolidated Interim Financial Statements of Landsbankinn hf. for the first six months ended 30 June 2014 have been prepared in accordance with International Accounting Standard (IAS) 34 Interim Financial Reporting as adopted by the EU.

It is our opinion that the Condensed Consolidated Interim Financial Statements of Landsbankinn hf. give a true and fair view of the consolidated financial performance of the Group for the first six months of 2014, its consolidated financial position as at 30 June 2014 and its consolidated cash flows for the first six months of 2014.

Furthermore, in our opinion, the Condensed Consolidated Interim Financial Statements of Landsbankinn hf. and Endorsement of its Board of Directors and CEO give a fair view of the development and performance of the Group's operations and its position and describe the principal risks and uncertainties faced by the Group.

The Board of Directors of the Bank and Chief Executive Officer hereby endorse the Condensed Consolidated Interim Financial Statements of Landsbankinn hf. for the first six months ended 30 June 2014.

Independent Auditor's Review Report

To the Board of Directors and Shareholders of Landsbankinn hf.

We have reviewed the accompanying Condensed Consolidated Statement of Financial Position of Landsbankinn hf. as at 30 June 2014 and the related Condensed Consolidated Income Statement, Changes in Equity and Condensed Cash Flows for the six-month period then ended and a summary of significant accounting policies and other explanatory information. Management is responsible for the preparation and presentation of this Condensed Consolidated Interim Financial information in accordance with IAS 34 *Interim Financial Reporting* as adopted by the EU. Our responsibility is to express a conclusion on this Condensed Consolidated Interim Financial information based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410 *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed consolidated interim financial information is not prepared, in all material respects, in accordance with IAS 34 *Interim Financial Reporting* as adopted by the EU.

Notes to the Condensed Consolidated Interim Financial Statements

1. Reporting entity

Landsbankinn hf. (hereinafter referred to as the "Bank" or "Landsbankinn") was founded on 7 October 2008 by the Ministry of Finance on behalf of the Icelandic State Treasury, thereby taking over part of the domestic operations of LBI hf. (formerly Landsbanki Íslands hf.).

The Bank is a limited liability company incorporated and domiciled in Iceland. The Bank operates in accordance with Act No. 161/2002, on Financial Undertakings, and is licensed by the Financial Supervisory Authority in Iceland (FME) as a commercial bank. The Bank is subject to supervision of the FME in accordance with Act No. 87/1998, on Official Supervision of Financial Activities. The registered address of the Bank's office is Austurstræti 11, 155 Reykjavík.

The Condensed Consolidated Interim Financial Statements of the Bank for the six months ended 30 June 2014 include the Bank and its subsidiaries (collectively referred to as the "Group" and individually as "Group entities"). The Group's primary lines of business are corporate and personal banking, investment banking, asset management and other related services. The Group operates solely in Iceland.

The issue of these Condensed Consolidated Interim Financial Statements was authorised by the Board of Directors and the CEO of the Bank on 21 August 2014.

2. Basis of preparation

Statement of compliance

These Condensed Consolidated Interim Financial Statements for the six months ended 30 June 2014 have been prepared in accordance with International Accounting Standard (IAS) 34 Interim Financial Reporting as adopted by the European Union.

The Condensed Consolidated Interim Financial Statements do not include all the information required for full annual financial statements and should be read in conjunction with the Consolidated Financial Statements of the Group as at and for the year ended 31 December 2013, which are available on the Bank's website, www.landsbankinn.is.

Going concern

The Bank's management has assessed the Group's ability to continue as a going concern and it has a reasonable expectation that the Group has adequate resources to continue its operations. Accordingly, these Condensed Consolidated Interim Financial Statements have been prepared on a going concern basis.

Basis of measurement

The Condensed Consolidated Interim Financial Statements have been prepared on a historical cost basis except for the following:

- Financial assets and liabilities classified as held for trading are measured at fair value;
- Financial assets and liabilities designated as at fair value through profit or loss are measured at fair value;
- Non-current assets and disposal groups classified as held for sale are measured at the lower of cost or fair value less costs to sell.

Functional and presentation currency

Items included in the financial statements of each individual Group entity are measured using the currency of the economic environment in which the respective entity operates (its functional currency). All amounts are presented in Icelandic *króna* (ISK), which is also the Bank's functional currency, rounded to the nearest million unless otherwise stated.

Use of estimates and judgements

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

In preparing the Condensed Consolidated Interim Financial Statements, the significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the Consolidated Financial Statements as at and for the year ended 31 December 2013.

Notes to the Condensed Consolidated Interim Financial Statements

3. Significant accounting policies

The Condensed Consolidated Interim Financial Statements have been prepared using uniform accounting policies for like transactions and other events in similar circumstances. The accounting policies applied by the Group in the Condensed Consolidated Interim Financial Statements are the same as those applied by the Group in its Consolidated Financial Statements as at and for the year ended 31 December 2013. The accounting policies applied have been applied consistently to all periods presented.

IFRS 10 Consolidated Financial Statements became effective on 1 January 2014 and has been applied in these Condensed Consolidated Interim Financial Statements. IFRS 10 establishes principles for the presentation and preparation of Consolidated Financial Statements when an entity controls one or more other entities. IFRS 10 establishes control as the basis for determining which entities are consolidated. The principle of control sets out three elements of control: (a) power over an investee, (b) exposure, or rights, to variable returns from involvement with the investee, and (c) the ability to use power over the investee to affect the amount of the investor's returns. IFRS 10 contains guidance on how to apply the control principle in various circumstances, including situations where the investor holds less than a majority of voting rights. IFRS 10 carries forward the consolidation procedures from IAS 27 Consolidated and Separate Financial Statements (as amended in 2008). IFRS 10 supersedes IAS 27 (2008) and SIC-12 Consolidation – Special Purpose Entities. The adoption of IFRS 10 does not have any impact on the Bank's Financial Statements.

4. Operating segments

The business segments are presented in accordance with internal reporting to the CEO and the Board of Directors, who are responsible for allocating resources to the reportable segments and assessing their financial performance.

In April 2014, the Bank opened a specialised Corporate Service Centre for small and medium-sized enterprises (SMEs) located in the capital city region. As a result, the services to these SME's have shifted from Personal to Corporate Banking. At the end of the reporting period the Group continues as before with its four main business segments.

- **Personal Banking** provides financial services through the Bank's branch network to individuals and to small and medium-size businesses outside the capital city region.
- **Corporate Banking** provides financial services to large and medium-size corporate clients and to small and medium-size businesses in the capital city region. It also provides restructuring solutions for underperforming businesses.
- **Markets** provide brokerage services in securities, foreign currencies and derivatives, sale of securities issues, money market lending and advisory services. Markets provide a range of wealth and asset management products and services for individuals, corporations and institutional investors. Horn fjárfestingarfélag and Landsbréf, subsidiaries of the Bank, are included in Markets.
- **Treasury** incorporates unallocated capital, funding, liquidity and interbank functions for the Bank, as well as management of the Group's market risk.

Support functions comprise of Finance (excluding Treasury), Risk Management, Corporate Development & HR and Operations & IT.

Reconciliation consists of eliminations and transactions that cannot be allocated to any one segment.

Administrative expenses of the Group's support functions are allocated to appropriate business segments based on the underlying cost drivers. Expenses are allocated to the business units at market price level. Support functions supply services to business units and transactions are settled at unit prices or on an arm's-length basis, if possible, on the basis of consumption and activity.

The following table summarises each segment's financial performance as disclosed in the internal management reports on segment profits before tax. In these reports, all income statement items are reported on a net basis, including the total interest income and expense. Inter-segment pricing is determined on an arm's length basis.

No revenue from transactions with a single external customer or counterparty amounted to 10% or more of the Group's total revenue during the periods from 1 January to 30 June 2014 and 2013.

11. Income tax

Income tax is recognised based on the tax rates and tax laws enacted by the end of the year, according to which the domestic corporate income tax rate was 20.0% (2013: 20.0%). An additional special income tax on financial institutions is recognised at a rate of 6% on an income tax base exceeding ISK 1,000 million in accordance with Act No. 165/2011, on Financial Activities Tax.

Income tax recognised in the income statement is specified as follows:

	2014 1.1-30.6	2013 1.1-30.6
Current tax expense	(4,269)	(3,174)
Special income tax on financial institutions	(1,213)	-
Difference of prior year's imposed and calculated income tax	110	-
Deferred tax expense	415	(947)
Total	(4,957)	(4,121)

The tax on Group profit differs to the following extent from the amount that would theoretically arise by the domestic corporate income tax rate:

	1.1-30.6.2014	1.1-30.6.2013
Profit before tax	21,470	19,831
Tax on liabilities of financial institutions	(1,635)	(185)

12. Classification and fair value of financial assets and liabilities

According to IAS 39, financial assets and liabilities must be classified into specific categories which affect how they are measured after initial recognition. Each category's basis of subsequent measurement is specified below:

- Loans and receivables, measured at amortised cost;
- Financial assets and liabilities held for trading, measured at fair value;
- Financial assets designated as at fair value through profit or loss, measured at fair value;
- Other financial liabilities, measured at amortised cost.

The following table shows the classification of the Group's financial assets and liabilities according to IAS 39 and their fair values as at 30 June 2014:

12. Classification and fair value of financial assets and liabilities (continued)

The fair value of financial assets and liabilities was determined based on the same valuation methods as those described in the Group's Consolidated Financial Statements as at and for the year ended 31 December 2013.

Fair value hierarchy

The Group has used a valuation hierarchy for disclosure of inputs to valuation used to measure fair value. Fair value measurements of financial instruments are made on the basis of the following hierarchy:

- Level 1: Quoted prices are used for assets and liabilities traded in active markets. Unadjusted quoted prices are used as the measurement of fair value.
- Level 2: Valuation technique based on observable inputs. The most recent transaction prices in combination with generally accepted valuation methods are used to measure fair value of shares and the yield of actively traded bonds with the same duration is used as a benchmark for the valuation of bonds.
- Level 3: Valuation technique based on significant non-observable inputs. It includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have significant effect on the instrument's valuation. For unlisted shares and bonds where there is no market data available, various generally accepted valuation techniques are used to measure fair value. Valuation using discounted cash flow or a comparison of peer companies multiples are the most commonly used methods to calculate fair value of unlisted shares in addition to recent transactions and market conditions.

Assumptions and inputs used in the valuation technique include risk-free and benchmark interest rates for estimating discount rates, credit spreads, bonds and equity prices, foreign currency exchange rates, market multipliers, market conditions for estimating future growth and other market indicators.

Valuation framework

The Bank's Risk & Finance Committee is responsible for fair value measurements of financial assets and liabilities classified as Level 2 and 3 instruments. Furthermore, the Committee oversees the Group's overall risk. The Bank's Valuation group reports its valuation results to the Risk & Finance Committee for verification. The Valuation group is comprised of personnel from Risk Management, Treasury and Accounting. The Valuation group holds meetings monthly to determine the value of Level 2 and Level 3 financial assets and liabilities.

The following table shows the Level in the hierarchy into which the fair value of financial assets and liabilities, carried at fair value in the Consolidated Statement of Financial Position, are categorised as at 30 June 2014:

Financial assets	Level 1	Level 2	Level 3	Total
Bonds and debt instruments	161,045	15,356	9,126	185,527
Equities and equity instruments	8,749	-	33,472	42,221
Derivative instruments	-	44	-	44
Total	169,794	15,400	42,598	227,792
Financial liabilities				
Derivative instruments	-	549	-	549
Short positions	4,980	-	-	4,980
Total	4,980	549	0	5,529

During the period from 1 January to 30 June 2014 there were no transfers between Level 1, Level 2 or Level 3.

The following table shows the Level in the hierarchy into which the fair value of financial assets and liabilities, carried at fair value in the Consolidated Statement of Financial position, are categorised as at 31 December 2013:

Financial assets	Level 1	Level 2	Level 3	Total
Bonds and debt instruments	152,472	15,547	10,674	178,693
Equities and equity instruments	8,209	1	28,064	36,275
Derivative instruments	-	654	-	654
Total	160,681	16,202	38,738	215,622
Financial liabilities				
Derivative instruments	-	583	-	582
Short positions	6,988	-	-	6,988
Total	6,988	583	0	7,571

During the year 2013, certain securities with a carrying amount of ISK 30 billion were transferred from Level 2 to Level 1 in the fair value hierarchy due to changes in market conditions. Price determination of these securities became more dynamic; consequently, unadjusted quoted prices can be used as a measurement of fair value.

Reposessed collateral

Reposessed collateral consists mainly of property and equipment resulting from collateral foreclosed by the Group as security for loans and advances. The Group's policy is to pursue timely realisation of the reposessed collateral in an orderly manner. The Group generally does not use the non-cash reposessed collateral for its own operations. Reposessed collateral is recognised as an asset of either the Bank or its subsidiary Hömlur ehf.

Total covered bonds					1,925
Secured bonds total as at 31.12.2013					239,642

The secured bonds which the Bank issued to LBI hf. consist of the secured bonds issued in October 2010 as part of the acquisition price for the Icelandic operations of LBI hf. and the secured bonds issued in April 2013 as the additional consideration for the assets and liabilities transferred from LBI hf. to the Bank in October 2008. Both of these secured bond issues are denominated in EUR, USD and GBP. The carrying amount of the bonds as at 30 June 2014 and December 2013 assumes the effective interest of EURIBOR/LIBOR+2.90% to maturity.

The secured bonds which the Bank issued to LBI hf. mature in October 2018 with originally scheduled quarterly instalments starting in 2014. The interest rates are 3-month EURIBOR for the EUR-denominated bond and 3-month LIBOR for the GBP and USD-denominated bonds. During the years 2012 and 2013, the Bank made mandatory early redemptions and optional and partial early redemptions of the outstanding secured bonds to LBI hf. The prepayments will reduce, on a pro-rata basis, maturities of the bonds arising between 2014 and 2018.

From 30 June 2010, the bondholders have had the right to require the Bank to convert the secured bonds which the Bank issued to LBI hf. into Eurobonds. Upon such conversion, the Bank will make reasonable endeavours to list such Eurobonds on a qualified stock exchange, as soon as feasible following conversion. The bondholders have not yet exercised their right to require the Bank to convert the bonds into Eurobonds.

In March 2014, the Bank concluded a sale of an additional ISK 1,500 million in Landsbankinn's non-indexed covered bond series, LBANK CB 16, at a yield of 6.4%. This latest issue of the bonds was admitted for trading on NASDAQ OMX Iceland in the same month. The total size limit of this bond series is ISK 10,000 million and the previous issue amounted to ISK 1,920 million. The bonds carry a 3-year fixed interest rate of 6.3%. The covered bonds issue provides broader funding opportunities for the Bank's mortgage portfolio and reduces the Bank's fixed interest rate risk.

The Bank has committed itself to pledge certain pools of loans to customers as collateral for the secured bonds issued to LBI hf. and the issue of the covered bonds. The Bank must maintain a minimum coverage ratio of 124.7% for the secured bonds issued to LBI hf. and a minimum coverage ratio of 120% for the covered bonds. For further details on encumbered assets, see Note 22.

On 8 May 2014, the Bank and the Winding-up Board of LBI hf. reached an agreement on extension of the repayment schedule of the secured bonds which the Bank issued to LBI hf. The agreement is conditional upon the Winding-up Board of LBI hf. obtaining certain exemptions from capital controls from the Central Bank of Iceland. Under this agreement the repayment schedule for the years 2014-2018 would be extended to the years 2014-2026 with bond tranches maturing every second year throughout the period. Each of the tranches will be equivalent to approximately ISK 30,000 million, except for the 2014 tranche of ISK 36,000 million and the 2018 tranche of ISK 40,000 million. Interest rate terms will remain unchanged at a 2.90% margin until October 2018, stepping up to a 3.50% margin for the 2020 tranche, a 3.65% margin for the 2022 tranche, 3.95% for the 2024 tranche and a 4.05% margin for the 2026 tranche. The Bank will be required to use proceeds from any new foreign currency debt financing, above a certain threshold, to make prepayments on the bonds. Otherwise, the Bank will have increased flexibility in terms of how optional and mandatory prepayments of the bonds will be applied against outstanding maturities, without any additional costs. The minimum coverage ratio for the secured bonds will be reduced from 124.7% to 115%. Furthermore, the Bank will not be required to convert any outstanding bonds to Eurobonds before October 2018 and specific restrictions on dividend payments will be removed.

19. Equity

In February 2014, the Bank completed the allocation of own shares received from LBI hf. in 2013, in accordance with LBI hf. requirements and a resolution passed at a shareholder's meeting of the Bank in July 2013. The net result of the 500 million shares being allocated, and partly repurchased by the Bank for settlement of tax obligations and pension liabilities, is that the Bank's current and former employees now own 187 million shares in total (0.78%) and the Bank itself holds 313 million of own shares (1.30%).

At the Annual General Meeting of the Bank for the operating year 2013 held on 19 March 2014, shareholders approved the Board's proposal to pay dividends to shareholders in the amount of ISK 0.84 per share for the year 2013. Dividend was paid on 26 March 2014 to parties registered in the shareholders' registry on 19 March 2014. The dividend payment amounted to ISK 19,897 million on the outstanding shares.

21. Litigation

The Bank is party to litigation cases which arise in the ordinary course of business and are expected to have immaterial effect on the Group's financial position. However, since the establishment of the Bank, the Group has engaged in various material litigation cases, most of them being related to financial assets and liabilities transferred from Landsbanki Íslands hf. (now LBI hf.) to the Bank. These cases are material in the sense that they have had or may have significant impact on the amounts disclosed in the Group's financial statements.

At the end of the second quarter of 2014, all of the material cases that were reported open and not concluded at year-end 2013 in the litigation section of the Group's Consolidated Financial Statements for the year 2013 are still open with the exception of case No. 4 in the aforesaid Financial Statements. On 6 March 2014, the Supreme Court confirmed the District Court's judgment in this particular case and thereby acquitted the Bank of the company's claim.

Following Supreme Court rulings in 2012 on interest calculations of loans illegally indexed to foreign currencies, the Bank recalculated loans which the Bank expects to fall under the precedence of these rulings. The Bank has considered further court rulings necessary to clarify the scope of the legal precedence of these rulings for interest calculations of other loans. Pending material litigation cases filed against the Bank are expected to provide further clarification on the precedence of these rulings in the coming months. These pending material litigation cases at the end of the second quarter of 2014 are the following:

- In December 2012, a corporate customer of the Bank commenced litigation against the Bank demanding, inter alia, that the Court acknowledge that a loan agreement dating from June 2006 constitutes a loan denominated in the Icelandic krona (ISK), illegally indexed to foreign currencies, and should as such be recalculated in accordance with Act No. 38/2001. The Bank's view is that the loan agreement is a loan in foreign currencies, inter alia due to the fact that it was repaid in foreign currencies, and should therefore not be recalculated. The Bank's view is that it is of no relevance that the repayment currencies were not the same as the foreign currencies stipulated in the loan agreement. The case was heard by the District Court of Reykjavík which in its judgment concluded that the loan was in ISK indexed to foreign currencies. The case has been appealed to the Supreme Court and it is expected that the Court will hear the case in autumn 2014.

- In December 2013, a corporate customer of the Bank commenced litigation against the Bank claiming that previous recalculations of a foreign currency indexed loan should be recalculated in accordance with Supreme Court judgments No. 600/2011 and No. 464/2012 whereby interest rates determined by the Central Bank of Iceland (CBI) were considered by the Court as not being applicable in specified circumstances, inter alia, as the lender had issued final receipts for interest payments. One of the conditions established by the Supreme Court for rejecting CBI interest rates is that the additional claim, i.e. the difference between the CBI's interest amount and the interest amount appearing on the final receipts, would cause a serious disruption of a company's financial position. In this case the Bank takes the view that this condition is not met. The case is expected to be heard by the District Court of Reykjavík in autumn 2014.

- In May 2014, the Icelandic Competition Authority submitted to the Bank its preliminary assessment in a case regarding alleged breaches of competition rules by construction product stores operating in the Icelandic capital region. The investigation period extended from 2008 until March 2011. From October 2009, one of the stores, Húsasmiðjan ehf., was owned by Vestia Holdings ehf., a subsidiary of the Bank. In August 2010, Vestia Holdings ehf. was sold to Framtakssjóður Íslands slhf. (FSÍ) subject to approval by the Competition Authority, which was granted in January 2011. In December 2011, FSÍ sold Húsasmiðjan to Hömlur ehf., a subsidiary of the Bank, while all operations of the store were transferred and sold to a third company outside of the Landsbankinn Group. The name of the legal entity held by Hömlur was changed to Holtavegur 10 ehf. It was the preliminary assessment of the Competition Authority that fines might be imposed on Holtavegur 10 due to alleged breaches of competition law and that the Bank might potentially be held liable for such a fine since Húsasmiðjan was within the Landsbankinn Group during a part of the investigation period. The Bank submitted that there were no grounds for imposing a fine on the Bank inter alia as the Bank had accepted strict obligations not to interfere with companies held by Vestia Holdings and, consequently, never had any decisive influence on Húsasmiðjan. In July 2014, Holtavegur 10 entered into a settlement arrangement with the Competition Authority agreeing on the payment of a fine in the amount of ISK 325 million. Furthermore, the Authority acknowledged the arguments presented by the Bank, i.e. that there were no grounds for holding the Bank responsible or liable for the alleged breaches of competition rules. Consequently, the case has been closed.

Capital management

25. Capital management

The Group's capital management policies and practices ensure that the Group has sufficient capital to cover the risk associated with its activities. The capital management framework of the Group comprises four interdependent activities: Capital Assessment, Risk Appetite/Capital Target, Capital Planning, and Reporting/Monitoring. The Group regularly monitors and assesses its current risk profile in the most important business areas and for the most important risk types. Risk appetite sets out the level of risk the Group is willing to take in pursuit of its business objectives.

Capital requirements are defined by two external bodies: the European Council and the Financial Supervisory Authority in Iceland (FME). The basis of the requirements of both bodies is the EU Capital Requirements Directive (CRD). The regulatory minimum capital requirement under Pillar I of the directive is 8% of Risk Weighted Assets (RWA) for credit risk, market risk and operational risk. The Capital Adequacy Requirement is reviewed by the FME in the Supervisory Review and Evaluation Process (SREP). The FME also requires the Group to maintain a minimum core Tier 1 capital ratio of 12%.

In the latest Supervisory Review and Evaluation Process (SREP), based on year-end 2012, FME determined the Capital Adequacy Requirement to be 16.7%.

26. Capital base and Capital Adequacy Ratio

The Group's equity as at 30 June 2014 amounted to ISK 235,894 million (31.12.2013: ISK 241,359 million), equivalent to 20.4% (31.12.2013: 21.0%) of total assets, according to the Consolidated Statement of Financial Position. The Capital Adequacy Ratio, calculated in accordance with Article 84 of Act No. 161/2002, on Financial Undertakings, was 26.8% as at 30 June 2014 (31.12.2013: 26.7%). According to the Act, this ratio may not fall below 8%.

27. Maximum exposure to credit risk and concentration by industry sectors

The following tables show the Group's maximum credit risk exposure as at 30 June 2014 and 31 December 2013. For on-balance sheet assets, the exposures set out below are based on net carrying amounts as reported in the Statement of Financial Position. Off-balance sheet amounts in the tables below are the maximum amounts the Group might have to pay for guarantees, loan commitments in their full amount, and undrawn overdraft and credit card facilities.

The Group uses the ISAT 08 industry classification for corporate customers.

28. Collateral and loan-to-value by industry sectors

The loan-to-value (LTV) ratio expresses the maximum exposure of credit risk (carrying amount of loans and off-balance sheet items) as a percentage of the total value of collateral less a haircut. Loan-to-value is one of the key risk factors that is assessed when qualifying borrowers for a loan. The risk of default is always at the forefront of lending decisions, and the likelihood of a lender absorbing a loss in the foreclosure process increases as the collateral value decreases. A high LTV indicates that there are smaller cushions to protect against price falls or increases in the loan if repayments are not made and interest is added to the outstanding balance.

36. Large exposures

As at 30 June 2014, 8 Group clients were rated as large exposures in accordance with the FME's Rules on Large Exposures Incurred by Financial Undertakings No. 625/2013. Clients are rated as large exposures if their total obligations, or those of financially or administratively connected parties, exceed 10% of the Group's capital base. The large exposure amount is calculated after taking account of eligible collateral held. No exposure may attain the equivalent of 25% of the capital base. Net of eligible collateral there are four large exposures as at 30 June 2014 (31 December 2013; two clients).

As at 30 June 2014	Number of large exposures	Large exposures
Large exposures between 10% and 20% of the Group's capital base	4	117,984
Total	4	117,984

Total large exposures to capital base (400% is the maximum limit) 51%

As at 31 December 2013	Number of large exposures	Large exposures
Large exposures between 10% and 20% of the Group's capital base	2	70,696
Total	2	70,696

Total large exposures to capital base (400% is the maximum limit) 30%

Liquidity risk

37. Liquidity risk management

The key indicator of short-term liquidity risk is measured by the liquidity coverage ratio (LCR) which shows the ratio of high quality liquid assets to expected total net cash outflows over the next 30 days under a specified stress scenario. High quality liquid assets are comprised of cash at hand, balances with the Central Bank, assets eligible for repo transactions with the Central Bank and zero percent risk-weighted foreign government bonds. The following table shows values of the LCR as at 30 June 2014 and 31 December 2013:

	Liquidity coverage ratio total	Liquidity coverage ratio FX
As at 30 June 2014	110%	208%
As at 31 December 2013	102%	208%

Another key measure used by the Group for monitoring liquidity risk is the ratio of core liquid assets to deposits, which shows the ratio of deposits that the Group could deliver on demand without incurring any significant losses due to forced asset sales or other costly actions. Core liquid assets are comprised of cash at hand, balances with the Central Bank, loans to financial institutions (maturity within seven days), assets eligible for repo transactions with the Central Bank and zero percent risk-weighted foreign government bonds. Another method the Group uses is the cash ratio which shows the ratio of on-demand deposits that the Group could deliver with cash and cash equivalents such as cash at hand, balances with the Central Bank and loans to financial institutions (maturity within seven days). The following table shows various values of the core liquidity ratio and cash ratio as at 30 June 2014 and 31 December 2013:

	Core liquidity ratio		Cash ratio	
	30.6.2014	31.12.2013	30.6.2014	31.12.2013

Notes to the Consolidated Financial Statements

Market risk

40. Market risk management

The following table summarises the Group's exposure to market risk as at 30 June 2014 and 31 December 2013:

Market risk factor	30.6.2014	31.12.2013
	% of RWA	% of RWA
Equity price risk	7.1%	5.8%
Interest rate risk	3.0%	3.3%
Foreign exchange risk	2.2%	2.2%
Total	12.3%	11.3%

The currency risk in the Group's trading portfolios is disclosed together with that in its non-trading portfolios in Notes 44-45, together with the related sensitivity analysis.

41. Equity price risk

Equity price risk is the risk of equity value fluctuations due to open positions in equity-based instruments.

The Group's main equity portfolios consist of a trading portfolio, strictly focused on listed equities in ISK as part of market making and a proprietary portfolio containing both listed and unlisted equities, as part of asset and liability management. Furthermore, the Bank has a hedge portfolio for derivative sales, containing listed equities in ISK. Further details can be seen in Note 45, Concentration of currency risk.

42. Interest rate risk

The following tables summarise the Group's exposure to interest rate risk. The tables include interest-bearing financial assets and liabilities at their carrying amounts, while off-balance sheet amounts are the notional amounts of the derivative instruments (see Note 13). The amounts presented are categorised by the earlier of either the contractual repricing or the maturity date.

43. CPI indexation risk (all portfolios)

The consumer price index (CPI) indexation risk is the risk that the fair value or future cash flows of CPI-linked financial instruments may fluctuate due to changes in the Icelandic CPI. The Group has a considerable imbalance in its CPI-linked assets and liabilities. To mitigate this imbalance, which the Bank is in a limited position to do, the Bank offers non-CPI linked loans and CPI-linked deposits.

CPI indexation risk is managed centrally within the Group by the Treasury of the Bank, and is monitored by Market Risk. The following table summarizes the Group's CPI imbalance, calculated as the difference between CPI-indexed financial assets and liabilities, as at 30 June 2014 and 31 December 2013:

Carrying amount	30.6.2014	31.12.2013
Assets		
Bonds and debt instruments	18,717	18,688
Loans and advances to customers	250,418	249,681
Total	269,135	268,369
Liabilities		
Short positions	(416)	(483)
Deposits from customers	(99,743)	(102,555)
Total	(100,159)	(103,038)
Total on-balance sheet position	168,976	165,331
Total off-balance sheet position	(101)	(796)
Total CPI indexation balance	168,875	164,535

44. Currency risk (all portfolios)

The Group follows Rules No. 950/2010, on Foreign Exchange Balances, as set by the Central Bank of Iceland. The rules stipulate that an institution's foreign exchange balance (whether long or short) must always be within 15% of its capital base, in each currency and for all currencies combined. The Bank submits daily and monthly reports to the Central Bank with information on its foreign exchange balance.

The Group's combined net foreign exchange balance as at 30 June 2014 was +8.0% of the Group's capital base (31 December 2013: +6.1%). Uncertainty regarding the denomination currencies of the Group's loan portfolio has not been fully resolved in the period 1 January to 30 June 2014.

Notes to the Consolidated Financial Statements

45. Concentration of currency risk

The following tables summarise the Group's exposure to currency risk as at 30 June 2014 and 31 December 2013. The off-balance sheet amounts shown are the notional amounts of the Group's derivative instruments.

Amounts presented under assets and liabilities include all spot deals as at 30 June 2014 and 31 December 2013. When managing liquidity risk, the Group regards spot deals as non-derivative assets or liabilities.
