Source: Central Bank of Iceland, 30 November 2025

The Landsbankinn group delivers solid annual results in 2025

Profit 38 ISKbn	Return on equity 11.6%	Combined ratio of TM 94.9%
Net interest income +9%	Net fee & commission income +10%	Cost-income ratio 34.3%
Total lending 1,884 ISKbn	Total deposits 1,249 ISKbn	Equity 344 ISKbn

Return on equity (ROE) is 11.6% and all financial goals for 2025 were attained.

Net interest income is up by ISK 4.9 million between years while the interest margin is unchanged at 2.7%. **Net fee & commission income** is up by ISK 1.2 billion between years.

Operating expenses rise in tandem with changing price levels and the Bank's **cost-income ratio** remains low.

Net impairment charges on loans and receivables were ISK 1.2 billion. **Loans in arrears** remain historically low.

Total lending increased by 4.3% during the year. Lending to corporates grew by ISK 75 billion, while loans to retail customers increased by ISK 2 billion.

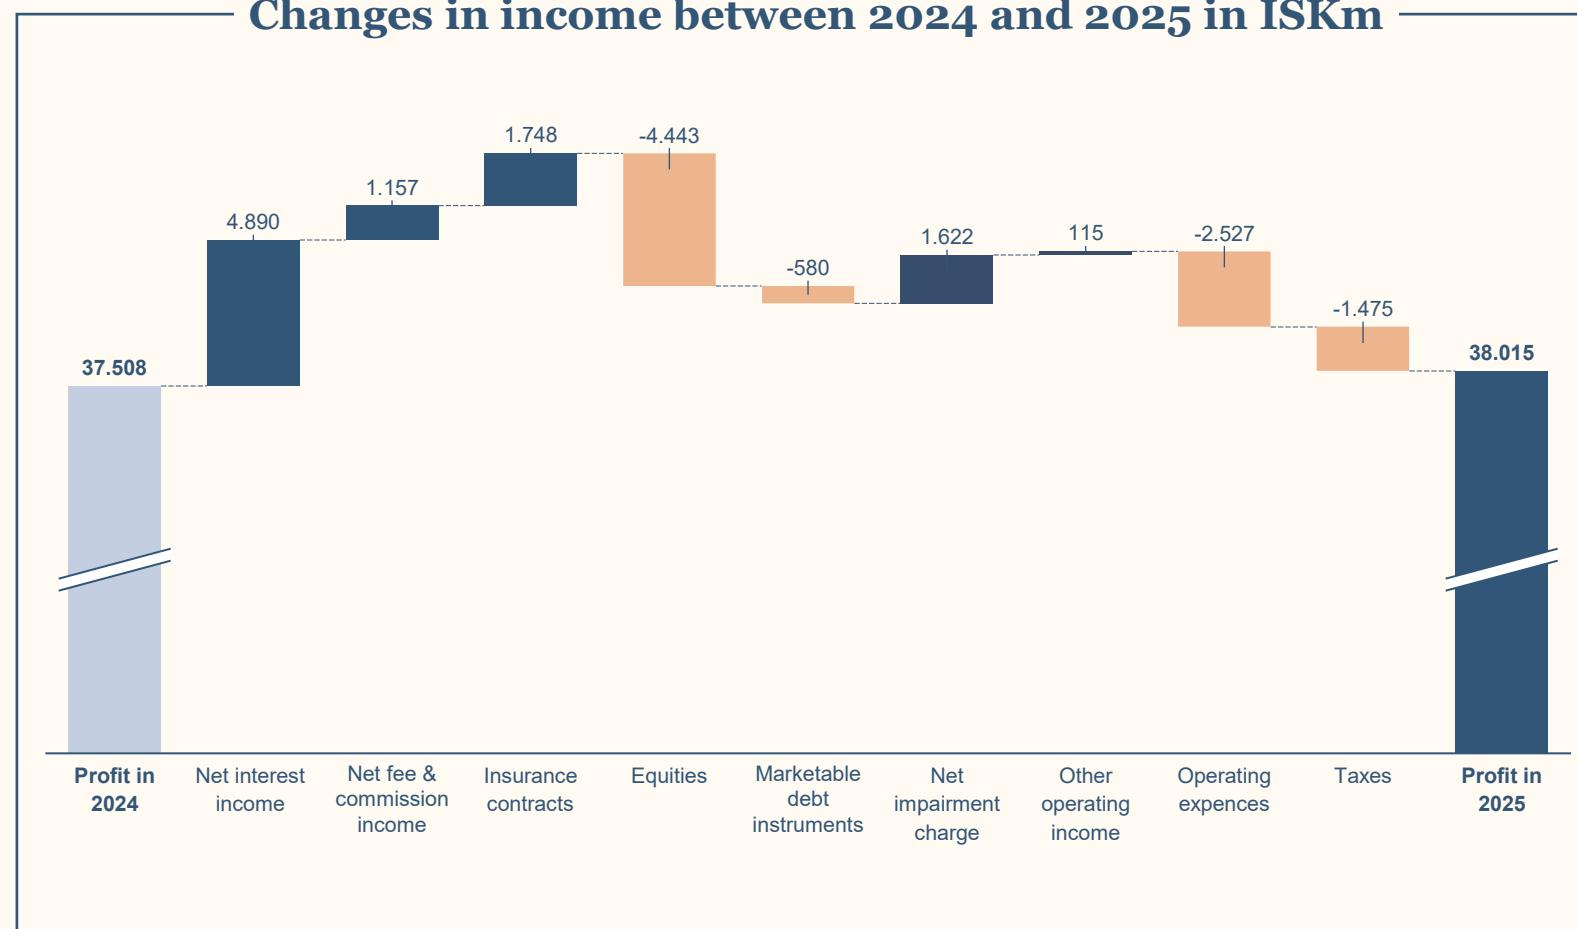

Funding has been successful. Diversification and efficiency in the Bank's capital structure grew in the first half of the year with the issuance of AT1 bonds and senior non-preferred bonds as well as the seventh issuance of green bonds, which was completed in October. The Bank's entire euro-denominated bond issuance is now green.

The Bank's **credit rating** was bumped up to A- in the first half of the year.

Dividends paid to shareholders in the year totalled ISK 18.9 billion, equivalent to half of the profit for 2024.

The Bank's **equity position is strong** and its capital ratio is 450 points above the 20.3% regulatory requirement and the leverage ratio is 13.6%.

Strong credit portfolio and diversified income deliver consistent results

Net interest income increases by 9% while net fee and commission income grows by 10%.

Demanding conditions on securities markets have negatively impacted the performance of equities.

Insurance* delivers ISK 1.7 billion. Insurance is part of the consolidated annual financial statement for the first time.

Net impairment charges on loans were ISK 1.2 billion. This is a more than 50% reduction from 2024, when the charge was ISK 2.8 billion.

Total taxes paid in 2025 amounted to ISK 19 billion, thereof ISK 3.5 billion a special tax on financial undertakings.

*In the period 28 February to 31 December

The fourth quarter was stable

Interest income contracts slightly between the fourth quarters of 2024 and 2025 while fee and commission income grows.

¹ General income tax on legal entities is 20% for the tax year 2025 (2024: 21%).

² 6% additional tax on a taxable income base in excess of ISK 1bn.

³ The special tax on financial undertakings is 0.145% based on the book value of liabilities at year-end and is paid annually. The tax is levied on the book value of liabilities, including tax liabilities, in excess of ISK 50 billion. The special tax on financial institutions comes under non-deductible income tax fees.

⁴ 5.5% tax on wages, recorded under wages and related expenses in the annual financial statements.

⁵ 6.35% social security charge, recorded under wages and related expenses in the annual financial statements.

Amounts in ISK million

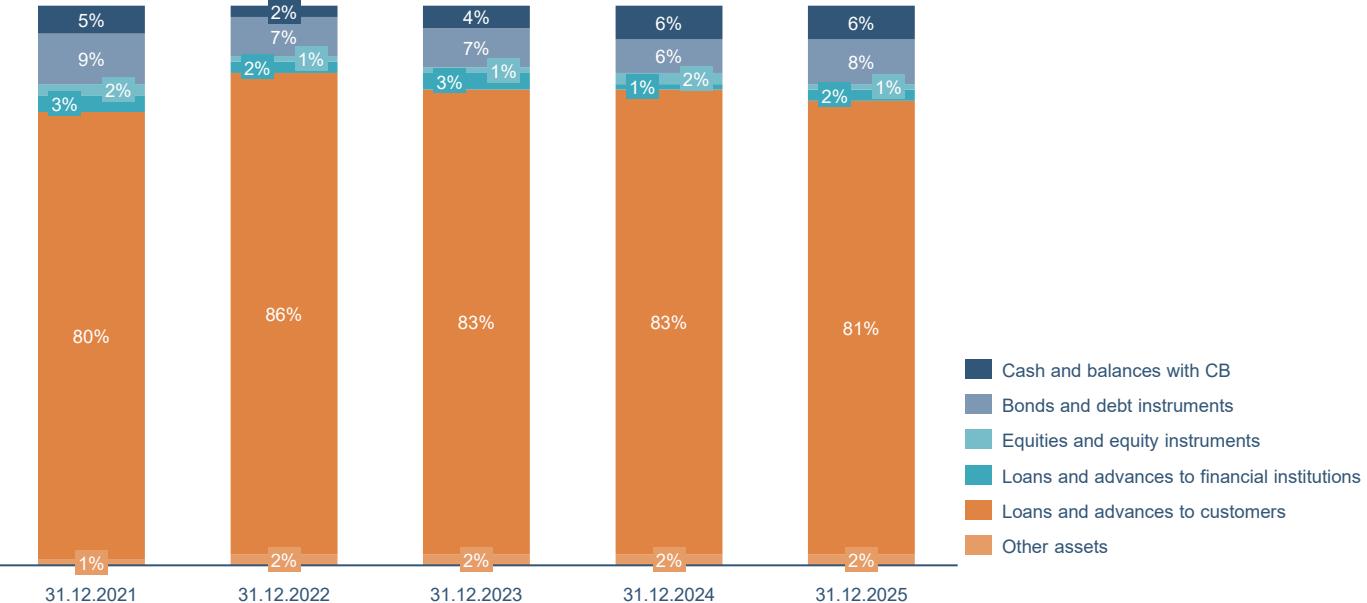

Balance sheet

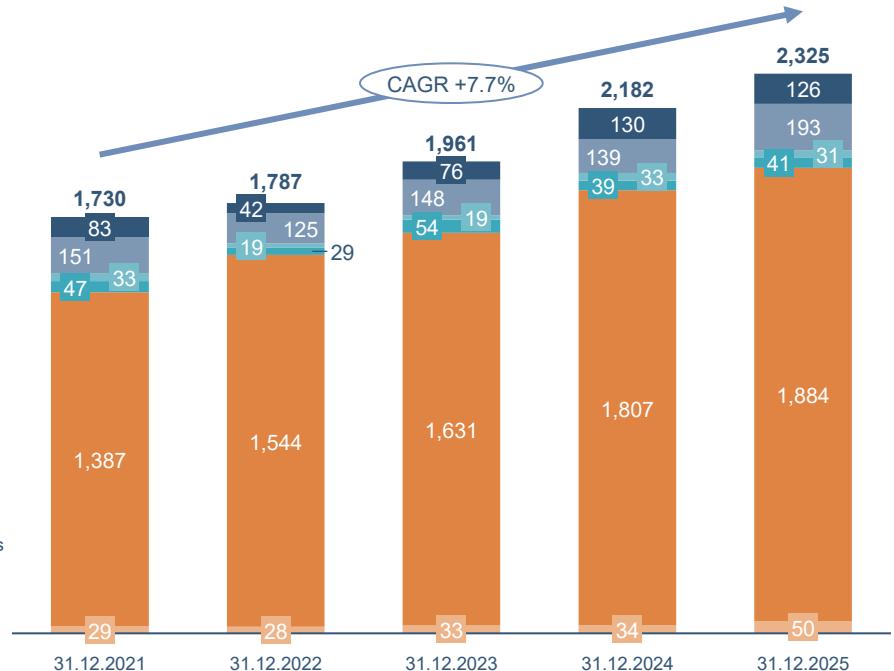

Total assets

Balance sheet growth aligns with growth in recent years. Loan portfolio growth slows down.

	31.12.2025	31.12.2024	Change	
Cash and balances with Central Bank	126	130	-4	-3%
Bonds and debt instruments	193	139	54	39%
Equities and equity instruments	31	33	-2	-6%
Loans and advances to financial institutions	41	39	2	5%
Loans and advances to customers	1,884	1,807	77	4%
Other assets	50	34	16	47%
Total	2,325	2,182	143	7%

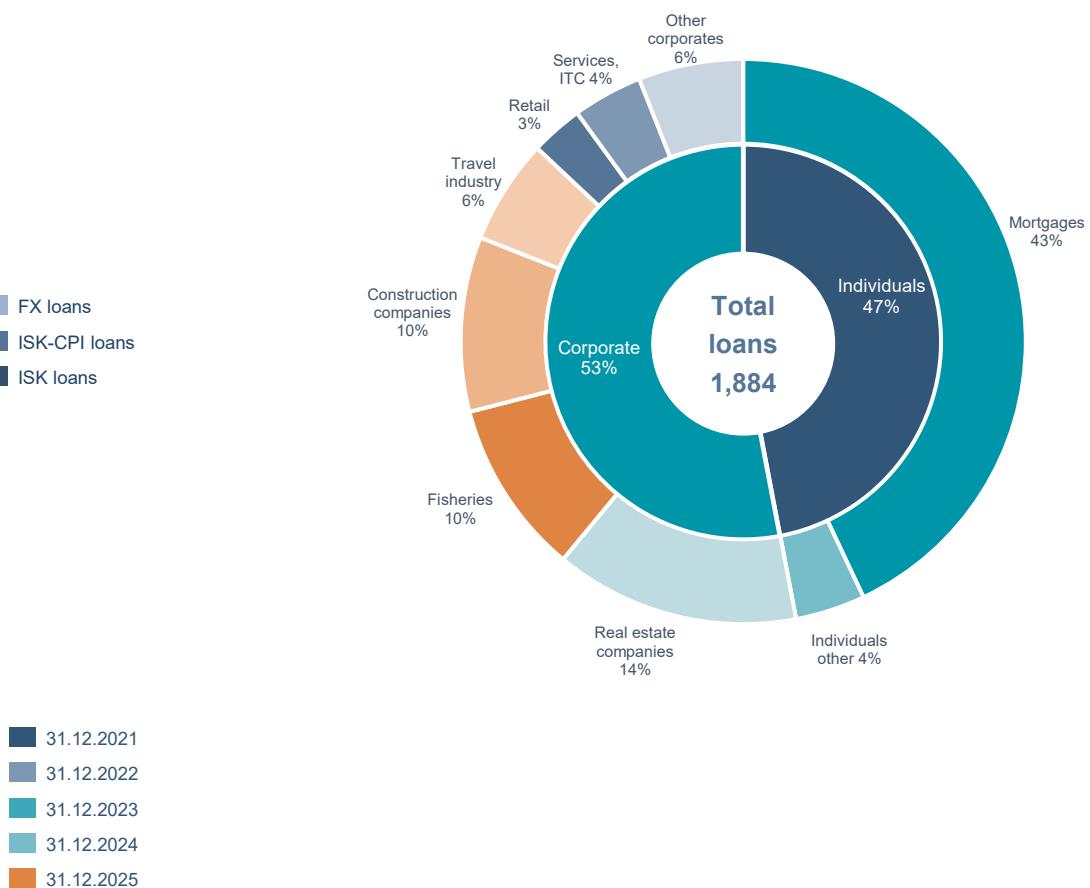

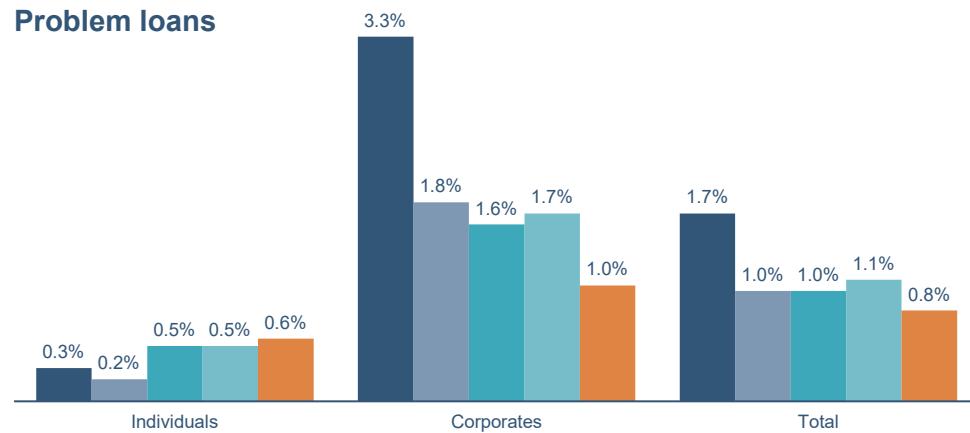

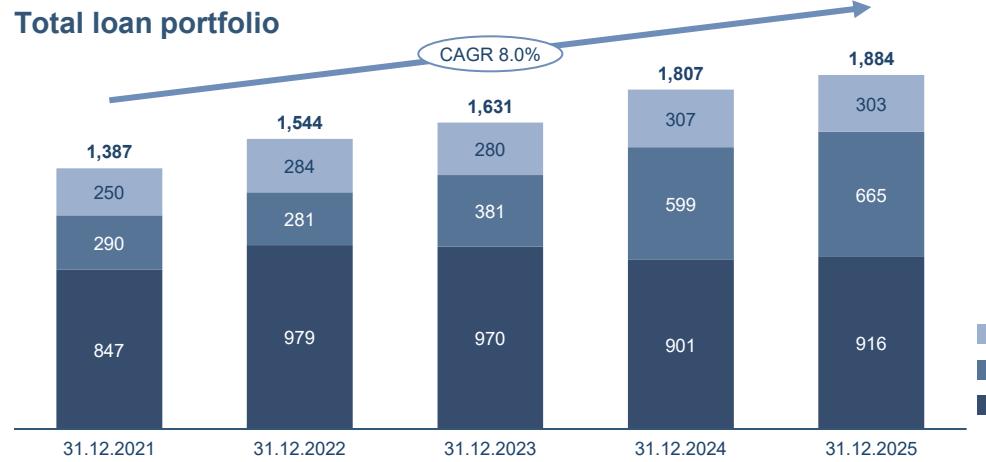

- The loan portfolio grows by 4.3% in 2025, or ISK 77 billion.
- Lending to corporates increases by 8% while lending to individuals is flat.
- Increased equity holdings in the Group are primarily from the TM asset portfolio.

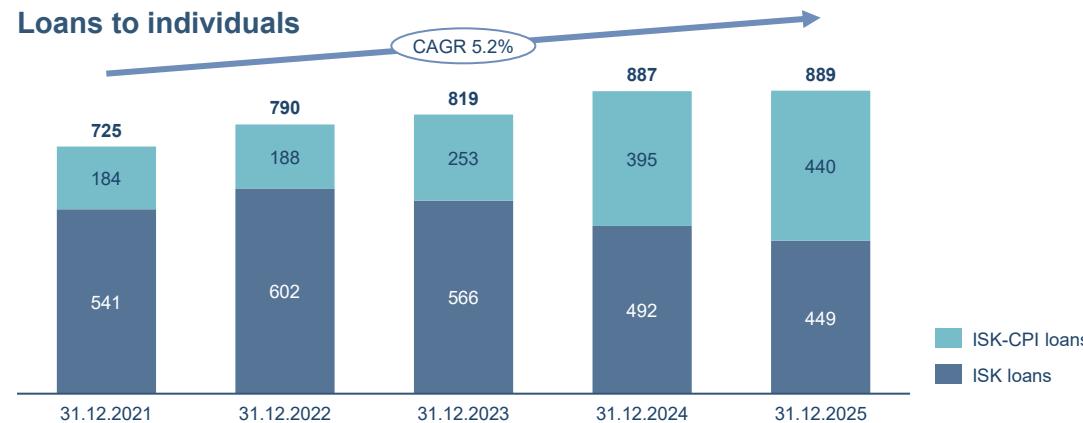

Loans

Modest lending growth while loans in arrears to both individuals and corporates remain low

Loans to individuals

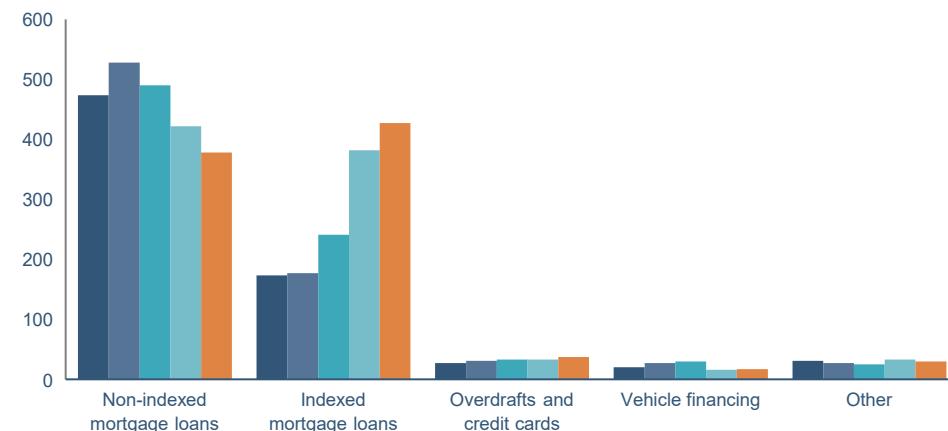

Inflation-indexed mortgages continue to grow alongside repayment and refinancing of non-indexed mortgages

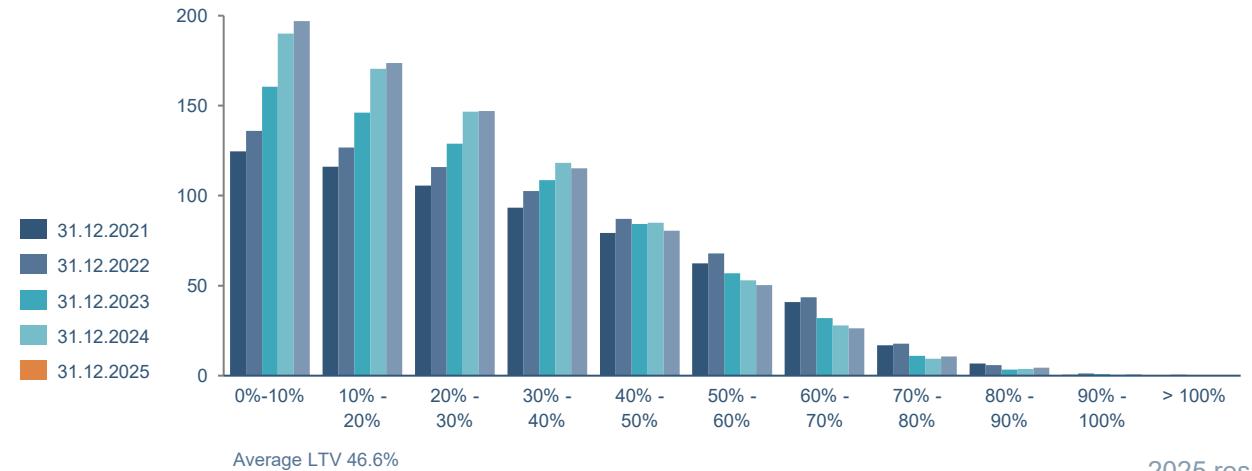

Legal proceedings on variable interest rate provisions in consumer mortgage loans

- In December 2021, litigation was commenced against the Bank claiming that provisions on variable interest rates in a non-indexed mortgage credit agreement should be deemed illegal. The Reykjavík District Court acquitted the Bank. The Supreme Court of Iceland has approved the plaintiff's request to appeal the case.
- On 22 December 2025, the Supreme Court passed a judgement that confirmed the District Court's ruling, acquitting the Bank.
 - On the one hand, lending provisions on interest rate changes were found null and void in so far that they referred to other factors than the CBI's rates.
 - On the other hand, the Supreme Court found that even when changes to loan interest rates had not followed immediately upon changes to the CBI's policy rates, they had been implemented within the timeframe allowed for under the provision.
- The Supreme Court thus confirmed the District Court ruling acquitting Landsbankinn in the case.

Loans to individuals by loan type

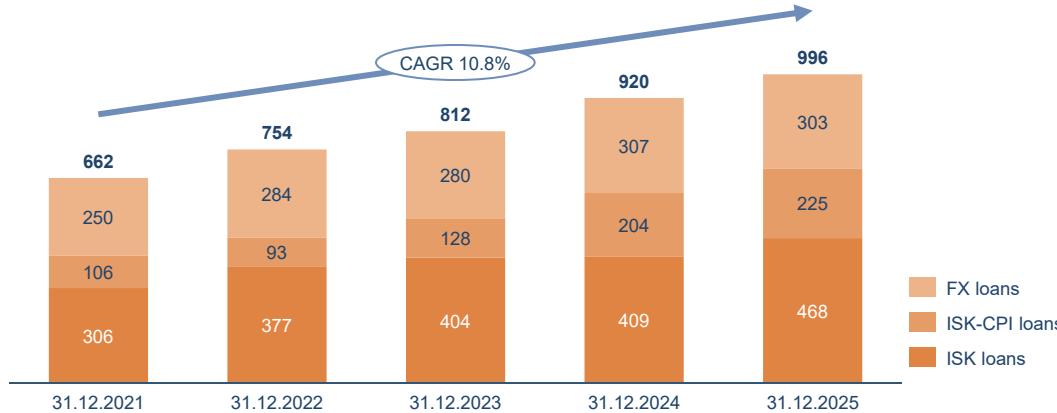

Continuous LTV distribution of mortgages

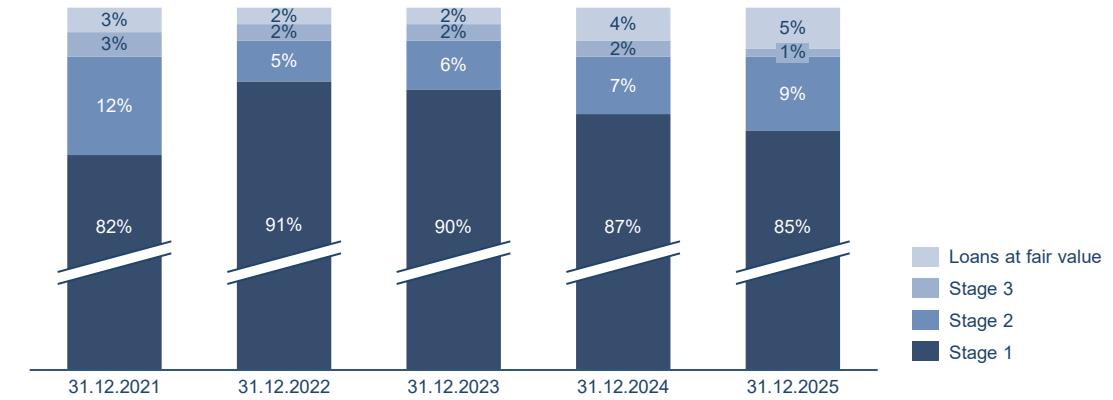

Loans to corporates

Good growth in lending to corporates, primarily ISK-denominated non-indexed loans

Loans to corporates

Stage allocation of loans to corporates

Loans to corporates by industry sector

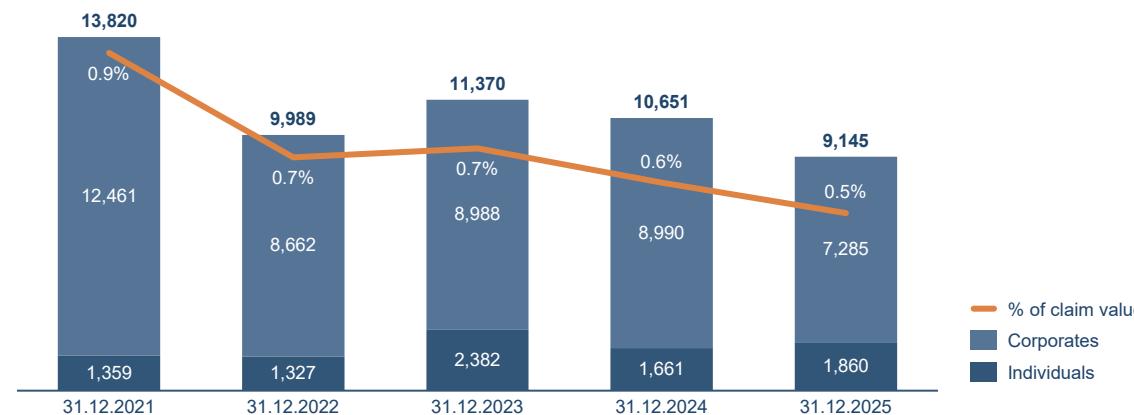

Amounts in ISKbn

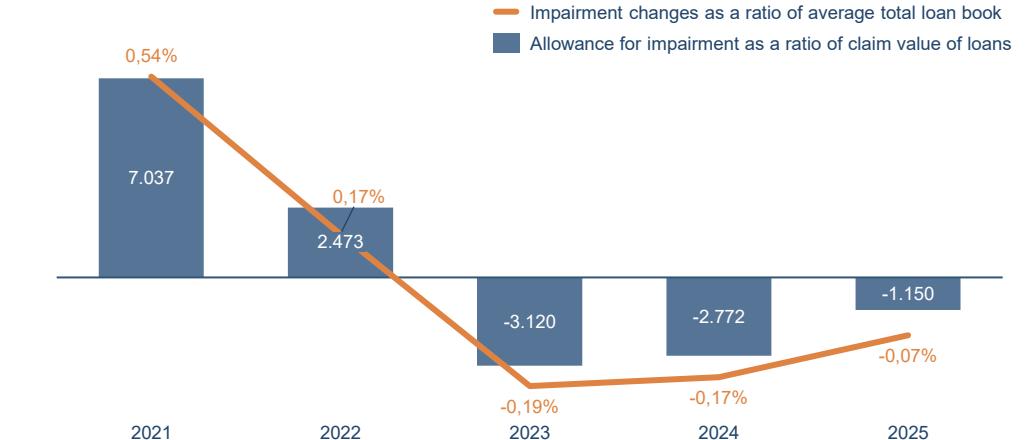

Impairment on loans

Loans in arrears remain low and collateralisation good. The Bank's allowance for impairment is ISK 9.1 billion, equivalent to 0.5% of the Bank's credit portfolio.

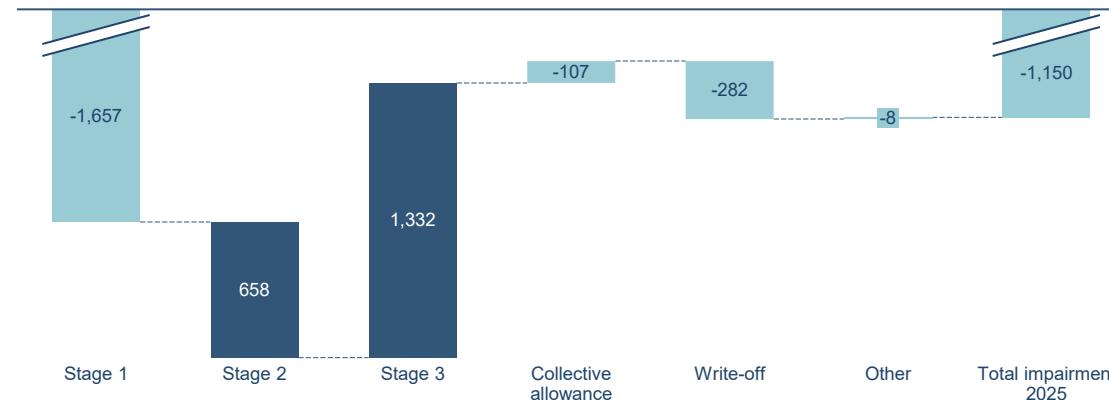

Allowance for impairment on loans and advances to customers

Cost of risk

Impairment on loans – PL impact

Amounts in ISKm

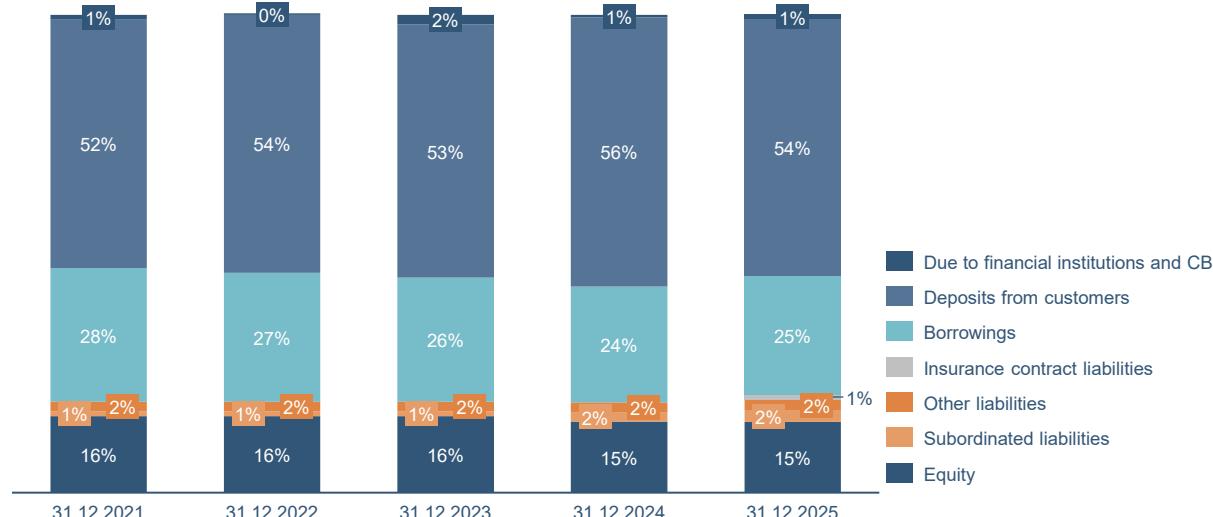

Loan staging

	Gross carrying amount	Allowance for impairment	Carrying amount
Stage 1	1,709,953	90.3%	2,796
Stage 2	115,835	6.1%	1,814
Stage 3	20,023	1.1%	4,535
Fair value	47,639	2.5%	0
Total	1,893,450	100%	9,145
		0.5%	1,884,305
		100%	100%

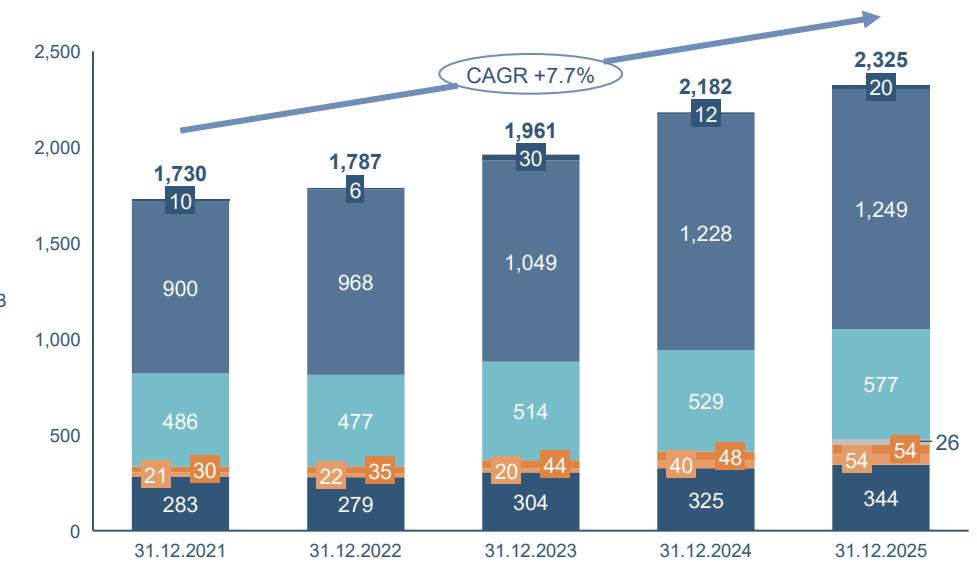

Liabilities and equity

Increased diversity in the Bank's funding structure yet deposits remain over 50% of total funding

	31.12.2025	31.12.2024	Change	
Due to financial institutions and CB	20	12	8	67%
Deposits from customers	1,249	1,228	21	2%
Borrowings	577	529	48	9%

Subordinated liabilities	54	40	14	35%
Equity	344	325	19	6%
Total	2,325	2,182	143	7%

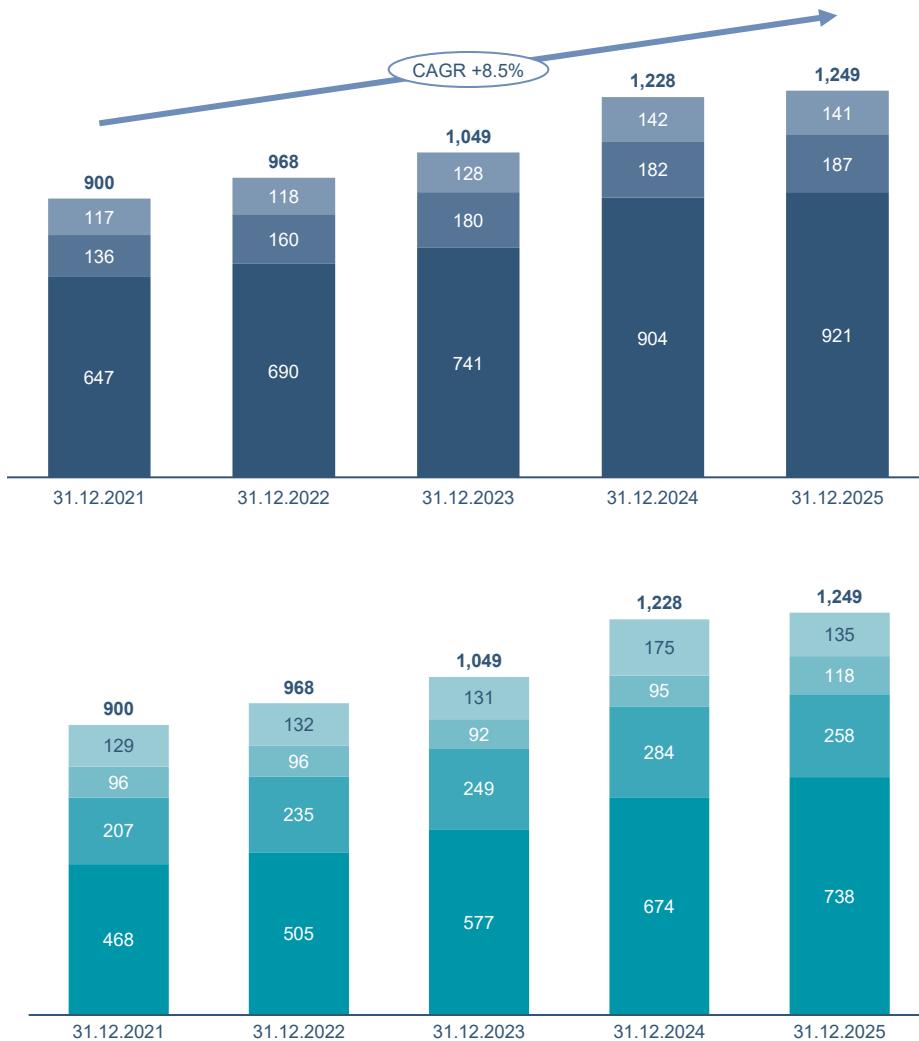

- The Group's insurance liability derives from TM.
- Increased subordinated funding strengthens dividend payment capacity and capacity for growth.

Deposits from customers

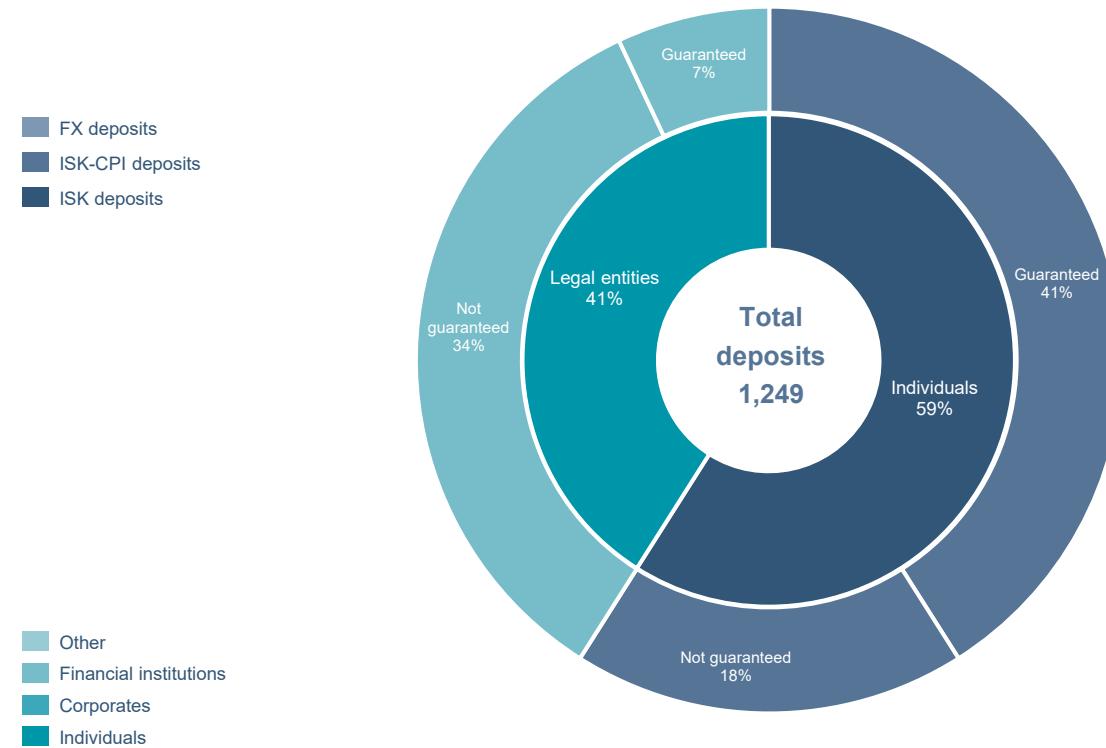

Continued growth of household deposits yet total deposit growth has slowed

Amounts in ISKbn

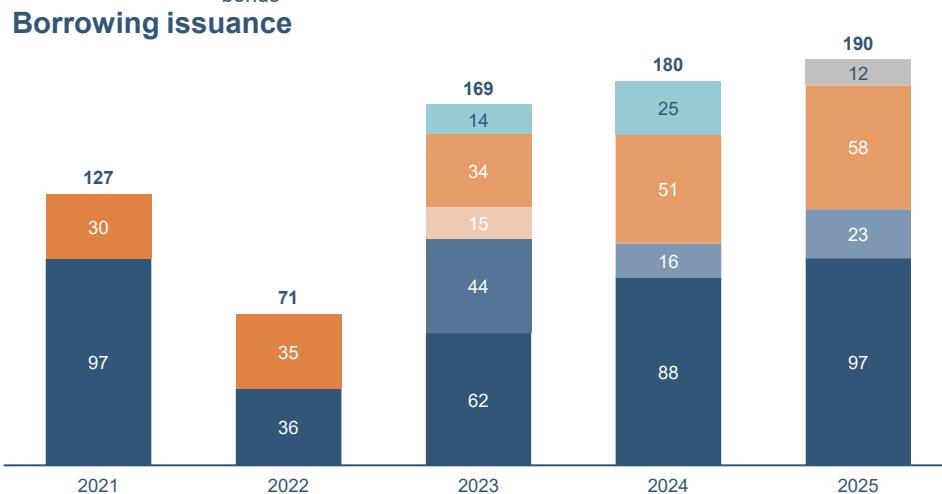

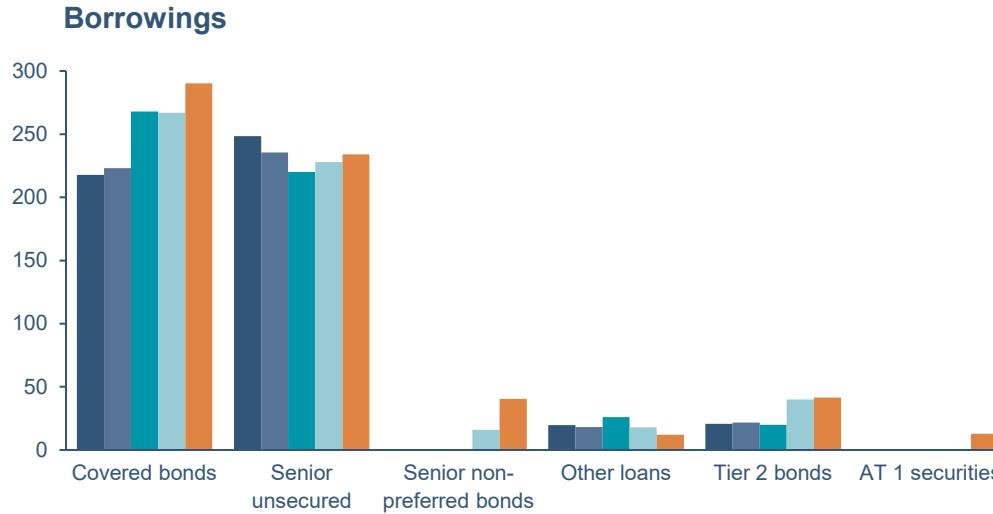

■ Household deposits grew by ISK 64 billion from beginning of the year, with total customer deposits increasing by ISK 21 billion during the year.

■ Deposits have priority over senior unsecured claims in the winding-up of deposit-taking institutions in Iceland. 48% of total deposits are guaranteed under the Act on Deposit Guarantees and Investor-Compensation Scheme.

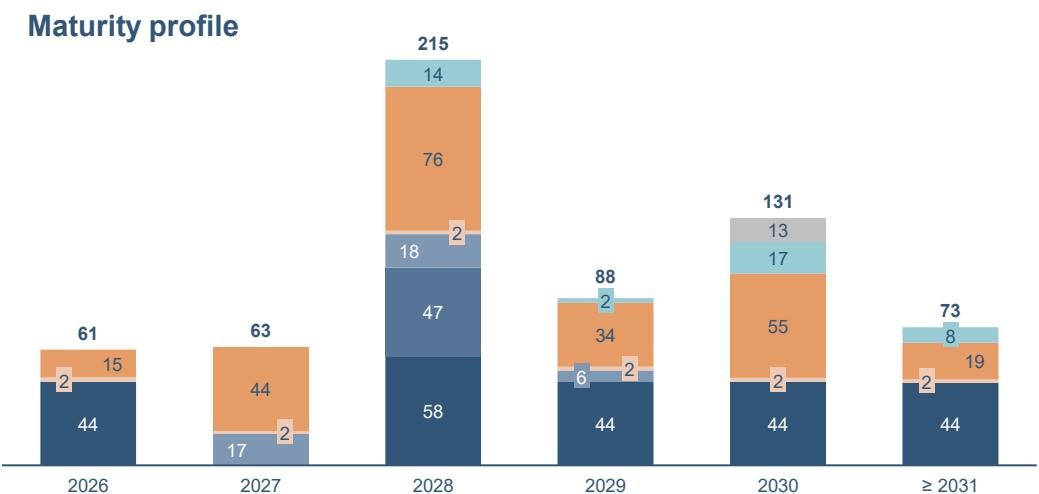

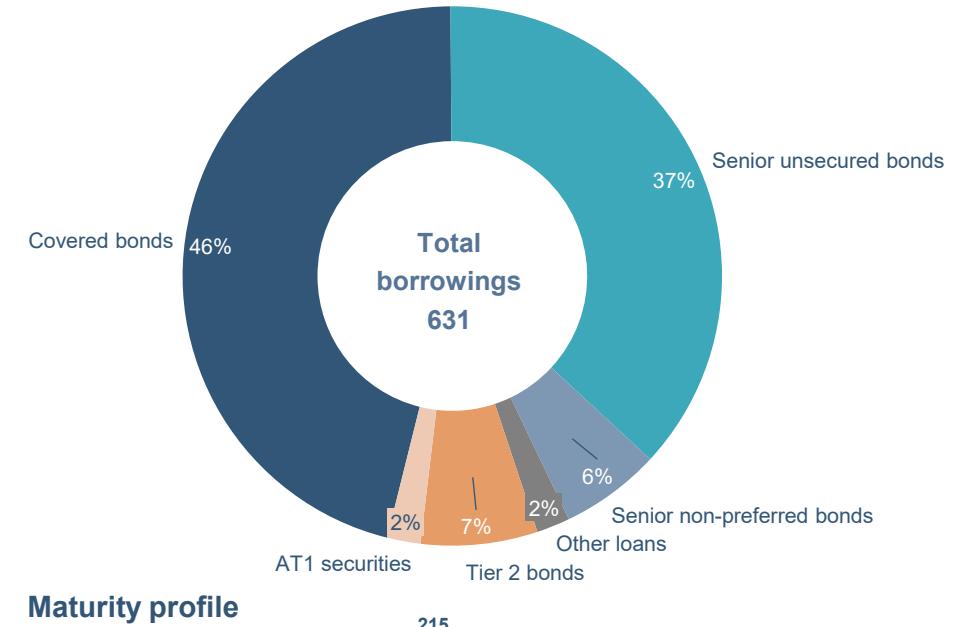

Borrowings

Increased efficiency in the Bank's funding structure achieved through successful issuance of AT1 and SNP bonds

Impact of CRR III implementation

Total capital ratio increases by 1.0%

	CRR II	CRR III	Change
Credit risk	1,372	1,344	-27
Market risk	15	15	0
Operational risk	152	114	-38
Total	1,538	1,473	-65
Total capital ratio	23.8%	24.8%	1.0%

RWEA for loans and advances – by exposure classes as in CRR III

- CRR III was implemented in Iceland in December 2025. The Bank has estimated the impact of the changes on risk-weighted assets as at 31 December 2025, including a comparison to a scenario in which CRR II had remained in force. The changes affect the calculation of credit risk and operational risk.
- The implementation of CRR III leads to an ISK 65 billion (4.3%) decrease in risk-weighted assets which translates into an increase in the total capital ratio, from 23.8% to 24.8%.
- The impact on credit risk primarily stems from customer lending, reflecting lower risk-weighted assets for loans secured by immovable property, partly offset by higher risk-weighted assets for ADC exposures.
- ADC exposures are subject to specific evaluation under CRR III and the majority of the Bank's ADC exposures are assigned a 150% risk weight at year-end 2025, despite temporary permission from the Central Bank of Iceland to apply a 20% borrower equity contribution instead of the 25% benchmark based on EBA guidelines. This results in an increase of ISK 121 billion in the Bank's risk-weighted assets.
- Risk-weighted assets related to the Bank's residential mortgage loans decrease by ISK 86 billion, as the vast majority of these loans have loan-to-value ratios below 55% and are assigned a 20% risk weight instead of the previous 35%.
- Risk-weighted assets related to other loans secured by immovable property decrease by ISK 47 billion, as CRR III allows a broader range of eligible collateral and the reduction generally reflects moderate loan-to-value ratios of the underlying exposures.
- Following the implementation of CRR III, the Bank calculates operational risk using the standardised approach instead of the basic indicator approach. The revised methodology results in a reduction of ISK 38 billion in risk-weighted assets.
- The implementation of changes related to market risk has been postponed until 2027. Such changes are considered likely to lead to an increase in risk-weighted assets.

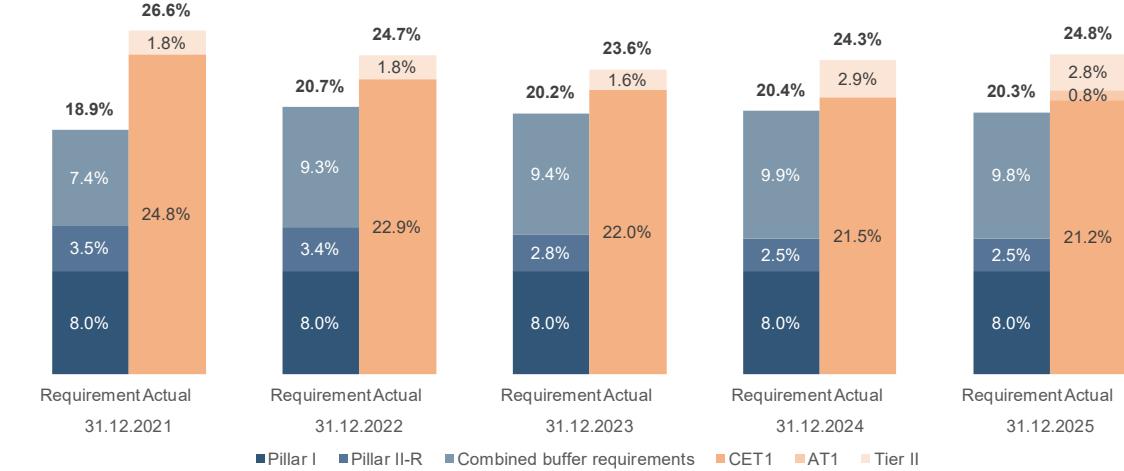

Capital requirements

Capital ratios well above regulatory requirements

	CET1	Tier 1	Total
Pillar I	4.5%	6.0%	8.0%
Pillar II-R	1.4%	1.8%	2.5%
Minimum requirement under Pillar I and Pillar II-R	5.9%	7.8%	10.5%
Systemic risk buffer	1.9%	1.9%	1.9%
Capital buffer for systematically important institutions	3.0%	3.0%	3.0%
Countercyclical capital buffer	2.4%	2.4%	2.4%
Capital conservation buffer	2.5%	2.5%	2.5%
Combined buffer requirements under Pillar II-G	9.8%	9.8%	9.8%
Total capital requirement	15.7%	17.6%	20.3%
Total capital ratio	21.2%	22.0%	24.8%

- The Group basis calculation of Pillar I capital requirements for lending and market risk on the standardised approach. The basic indicator approach is used to calculate operational risk. The Bank applies the dynamic approach in terms of the IFRS 9 transitional arrangements.
- The consolidated position according to CRR refers to the Landsbankinn accounting group, excluding subsidiaries in insurance activities.
- The leverage ratio is 13.6% at year end, reflecting the Bank's great financial strength.

Capital structure and total capital requirement

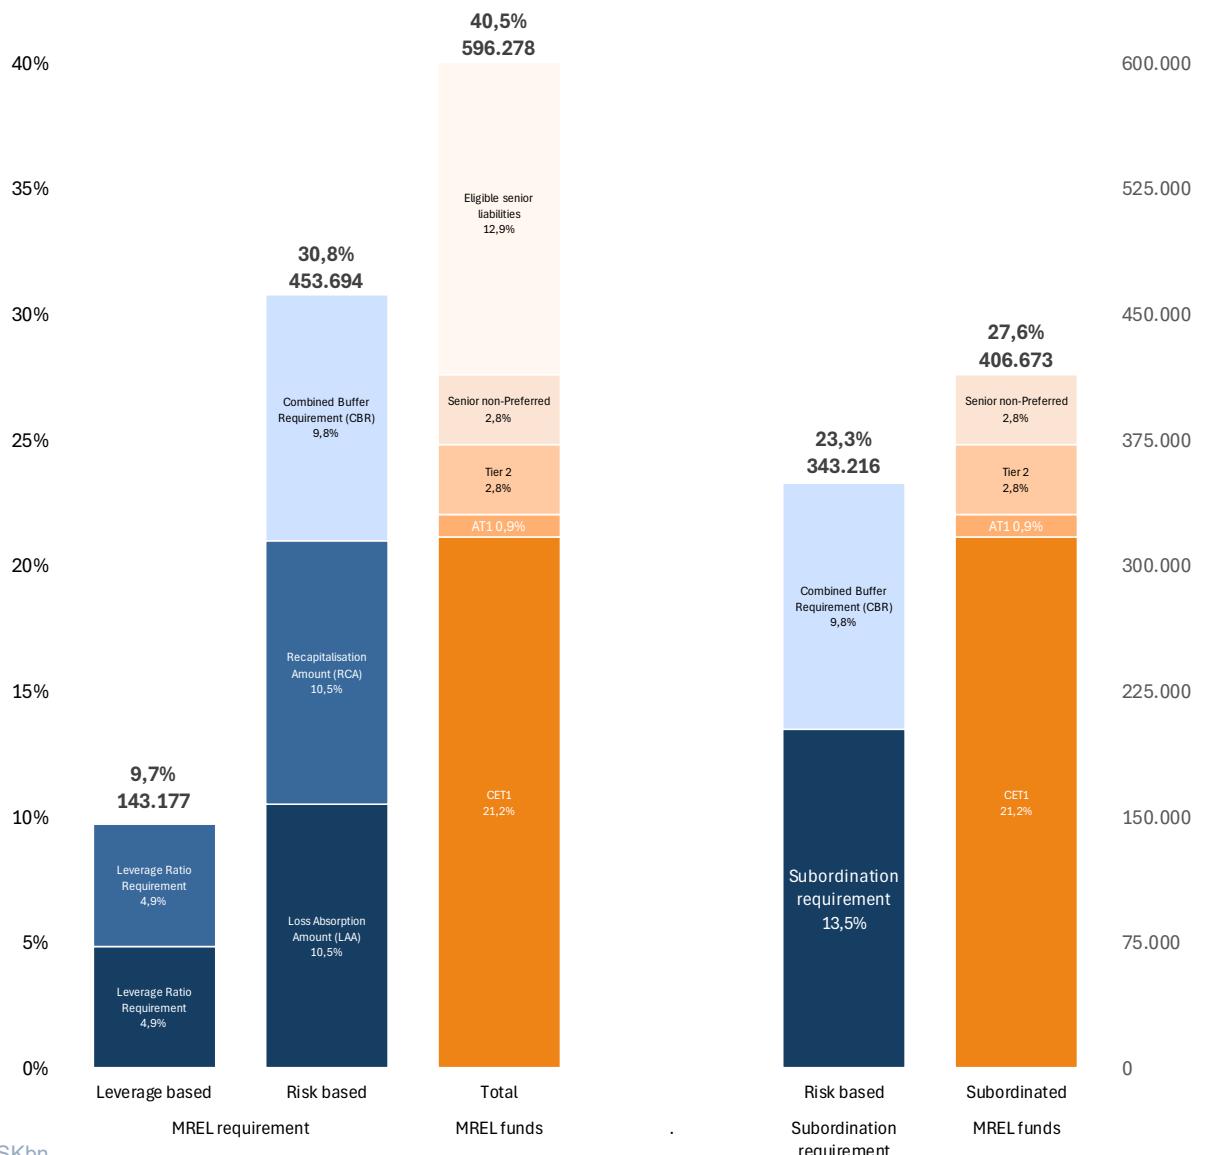

Risk weighted exposure amount

Minimum requirement for own funds and eligible liabilities (MREL)

Landsbankinn's MREL funds are well above requirements

The most recent MREL decision of the Resolution Authority of the Central Bank of Iceland (RA of the CBI) is from October 2025 and, according to law, is the higher of either:

■ **Risk-based:**

2 x (Pillar I + Pillar II-R) + Combined buffer requirements (CBR)

■ **Leverage-based:**

2 x Minimum leverage ratio requirement (3.0% of total exposure amount)

The RA has introduced a 13.5% MREL subordination requirement, in addition to the CBR, which must be fulfilled as of 4 October 2027.

At the end of March 2025, Landsbankinn's MREL requirement is 30.8% of RWEA, or the equivalent of ISK 453.7 billion.

■ Landsbankinn's MREL funding totals ISK 596.3 billion at year-end 2025, or 40.5% of RWEA.

The MREL subordination requirement for Landsbankinn is 23.3% of RWEA, or the equivalent of ISK 343.2 billion at year-end 2025.

■ The Bank's MREL subordinated funding amounts to a total of ISK 406.7 billion at year-end 2025, or the equivalent of 27.6% of RWEA.

The EU's Bank Recovery and Resolution Directive (BRRD) was transposed into Icelandic law in 2020.

■ The minimum requirements for own funds and eligible liabilities (MREL) is part of BRRD.

■ The RA of the CBI determines the MREL requirement for Landsbankinn as a systematically important domestic institution (O-SII).

Dividends

The Bank's dividend policy is to pay around 50% of last year's profit

Dividend proposal 2026

- The Board of Directors intends to propose a regular dividend payment amounting to 50% of profit from the year 2025 to the Annual General Meeting.
- The Board is also considering proposing payment of a special dividend.

Dividend 2025

- The 2025 AGM of Landsbankinn, held on 19 March 2025, approved the motion of the Board of Directors to pay shareholders a dividend of ISK 0.80 per share for the fiscal year 2024. It was further approved that the dividend be paid in two equal instalments, each of ISK 0.40 per share. The former instalment was paid on 26 March 2025 and the latter was paid on 17 September 2025. The total dividend amounts to ISK 18,891 million.

Landsbankinn's dividend policy

- Landsbankinn aims to pay regular dividends to shareholders amounting in general to around 50% of the previous year's profit. To achieve Landsbankinn's target capital ratio, the aim is also to make special dividend payments to optimise the Bank's capital structure.
- In determining the amount of dividend payments, the Bank's continued strong financial position shall be ensured. Regard shall be had for risk in the Bank's internal and external environment, growth prospects and the maintenance of a long-term, robust equity and liquidity position, as well as compliance with regulatory requirements of financial standing at any given time.

CET1 ratio, changes in 2025

CET1	301,0	38,0		-19,0	-9,1	0,9	311,8

A black and white photograph of a family of three sitting in a grassy field. A man in a dark jacket and light pants is smiling at the camera. A woman in a quilted jacket and light pants is holding a baby in a white bonnet. The background shows a body of water and distant mountains under a clear sky.

Appendix

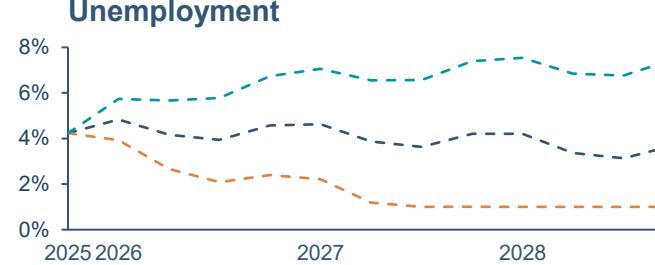

Economic scenarios for expected credit loss

- Landsbankinn Economic Research prepares scenarios to support forecasts for important economic variables.
- These scenarios show key economic variables used to calculate expected credit loss (ECL) for stages 1 and 2.
- The forecasts show averages for the 12-month outlook and to the medium-term forecast horizon.
- In calculating ECL, the optimistic scenario is given 15% weight, the baseline 70% weight and the pessimistic scenario 15% weight (2024: 15%-70%-15%).
